

## CONTACT LENS PATIENTS:

Contact lens prescriptions fall under the criteria of a drug prescription. FDA regulations apply. ***A contact lens prescription is valid for one year only.*** After one year, an annual contact lens examination/evaluation will be required to update the prescription and purchase contact lenses.

Contact lens examination/fitting fees include contact lens fit related progress/follow-up visits for a period of 90 days.

Patient/Guardian Initials \_\_\_\_\_

## iWellness & Optomap Screening

Sight threatening diseases including Glaucoma, Macular Degeneration, and Diabetes often have no outward symptoms in early states. This technology allows our doctors to see with unprecedented clarity what is invisible with traditional examination methods. The cost of this screening is \$39.00.

- In most cases, the iWellnessExam SD-OCT & Optomap Screening will replace traditional dilation; ***however, there are instances where dilation is required by your insurance carrier or if you have diabetes.***
- There are no lasting side effects to the iWellnessExam SD-OCT & Optomap; the image is available immediately for review, and is stored electronically for monitoring of changes in retinal health.

\_\_\_\_\_ Yes, I agree to have the iWellness & Optomap Retinal Exam

\_\_\_\_\_ No, I would prefer dilation \*

**\*Medicare requires dilation for a comprehensive eye exam; however, you may still opt to have the iWellness & Optomap Retinal exam.**
